Bed Size Guide

84 x 84-38 (fits 40" C/A) Fits most Fords

84 x 84-WF (fits 42" C/A) Fits Chevys and select 2018-19 Fords

84 x 84 MC (fits 37" - 39" C/A) - Most Dodges with Quad Cabs and Mega Cabs

NOTE: Measure from back of cab to center of rear axle to see which bed to go with. It is best to measure from center of truck, not from the side, because some cabs are curved and you won't get an accurate measurement.

84 x 112

90 x 112

96 x 112

These sizes are built to fit trucks with a 60" cab-to-axle and 34" frame width. They fit Ford and Dodge cab/chassis units. The 90" wide has been used commonly on Chevys.

96 x 136

This bed comes standard with an 84" cab-to-axle, 34" frame width, and fits all models. Check your cab-to-axle measurement when ordering.

84 x 102

96 x 102

These sizes fit box take-offs or box deletes and are 56" and 58" cab-to-axle. You will have to specify which cab-to-axle is needed when ordering.

The 38" frame width fits Fords up through 2017, Chevys through 1998 and Dodges up through 2002

The 42" frame width fits 2003 and newer dodges, 1999 and newer Chevys, and 2018 and newer Fords.

The 56" cab-to-axle is for Fords, Chevys, and older Dodges

The 58" cab-to-axle is for newer Dodges (Consistent 2010 and newer, spotty 2005-2010)

IMPORTANT NOTE: Always get the cab-to-axle measurement to make sure we get the right bed to the customers.
